

Embedded Print & Copy Control

Print & Copy Control (PCC)

Ricoh's newest Print & Copy Control (PCC) solution allows you to control device user access, track copy & print information, avoid waste and increase user mobility. As one of Ricoh's unique modules of the Equitrac Office™ and Equitrac Express™ suite, this software can be embedded onto the Hard Disk Drives of select Ricoh output systems. Built right in, installation and usage could not be easier.

Simple Authentication

With Print & Copy Control (PCC) you can easily control device user access. PCC makes use of your organisation's authentication systems – Active Directory, LDAP or the Equitrac Office™ or Equitrac Express™ accounts database – to validate user credentials. To unlock the system, you simply enter a PIN number or network user ID/password directly on the display of your MFP. You can optionally identify yourself by swiping your ID card through or waving it at the reader on your MFP. The supported ID card types are MIFARE®, LEGIC®, HID® Prox (iClass and 125 KHz) and magnetic stripe cards.

Document Accountability

Once authentication is taken care of, you can start copying or select one or more print jobs from your secure print list. Upon completion, the transaction is sent to your Equitrac Office™ or Equitrac Express™ server for centralised accounting

and activity reporting. Thanks to these reports you can easily recognise opportunities to reduce costs, minimise waste and optimise device deployment. Using the client billing module of Equitrac Office™/Equitrac Express™, PCC also simplifies project resource management. At the start of each walk up copy job, a billing code can be assigned to your transaction, specifying whether the job is billable or non-billable. Your Equitrac Office™/Equitrac Express™ database stores these transactions under the selected billing code, enabling you to easily recover and allocate document output costs.

Document Security

PCC transforms your Ricoh MFP into a secure personal printer that eliminates the worries of confidential data falling into the wrong hands. As usual, you print to a single network queue representing compatible Ricoh MFPs. When you use a pin code, network user ID/password or an ID card to authenticate at your device of choice, PCC will display your print jobs waiting to be released. PCC can also be used with optional Equitrac Office™/Equitrac Express™ workstation software which prompts you to supply a release key. When you use this key as identification method on your MFP of choice, only the print jobs related to that specific release key will be displayed.

Integrated user device access control

User login with PIN code, network user ID/password, or by swiping your card through or waving it at the card reader.

Print & Copy Control (PCC)

Key Features

Follow-You™ Printing

Thanks to Equitrac's Follow-You™ printing technology you can move between print servers, floors, buildings and locations, while avoiding busy or out of service devices. You can collect your personal output anytime and anywhere. Uncollected print jobs are not printed, but automatically deleted from the print server, preventing sensitive or costly documents from being left on the output tray or ending up in the waste bin.

A Plus on the Bottom Line

Print & Copy Control (PCC) eliminates the need to install, configure and service external hardware – along with multiple copier interface cables. If you are looking for a simple and cost effective approach for print/copy management, look no further than Ricoh's PCC in combination with Equitrac Office™ or Equitrac Express™.

User Interface

- Integrated with Aficio™ MFP operation panel
- Multi language end user screens (English, French, Italian, German, Spanish, Dutch, Danish, Norwegian, Finnish, Swedish, Polish, Portuguese, Czech, Hungarian)

User Authentication

- Primary PIN code only
- Primary and secondary PIN codes
- Network user ID and password
- ID cards, using Equitrac card reader (MIFARE®, LEGIC®, HID® Prox (iClass and 125 KHz) and magnetic stripe cards)

Principal Strengths

- Copy control and tracking
- Follow-You™ secure print tracking technology
- Client billing support
- Release key support
- User balance preview
- End of session summary (incl. costs and number of pages)

Key Benefits

- Increase document security controls
- Wide array of authentication mechanisms
- Increase user mobility
- Avoid and reduce waste
- Reduce IT requirements
- Reduce Total Cost of Ownership

For further details, system requirements and availability of compatible multifunctional products and firmware versions, please consult your local supplier.
